

CCST5037 Mathematics: A Cultural Heritage
Grade descriptor for Oral Presentation
General guideline

These should be taken as examples of the expectation to receive the score on the left in each section. It is not meant to be a completely exhaustive list.

	Organization	Contents	Critical Analysis	Communication	Group Dynamic	Q&A
2.5	Readily identifiable theme. Almost all content directly related to the theme and easy to follow. Perfect timing.	Thorough and detailed knowledge of the topic. Explanations nearly always clear, accurate and precise.	Thorough discussion. Insightful and interesting. Many individual ideas and clear evidence of critical thinking.	Excellent and attractive graphics or slides. A flawless presentation. Points are well articulated or effectively illustrated.	Evidence of good coordination and team work.	Answered questions clearly. Exhibited knowledge beyond what is written in slides.
1.5	Theme somewhat unclear or left implicit. Some unrelated content, occasionally difficult to follow. Adequate timing.	General knowledge of the topic. Explanations sometimes clear and accurate.	Limited insights. Some evidence of careful but not critical analysis.	A generally clear presentation with legible graphics. Main points not clearly articulated.	Coordination and team work is evident but not particularly smooth.	Answers give clear logical reasoning. Able to address most concerns or questions.
0.5	Unidentifiable theme. Content largely unrelated, hard to follow. Presentation clearly too short or too long.	Basic knowledge of the topic with some errors. Explanations consistently vague and inaccurate or facts just stated.	Information from various sources put together without critical assessment of validity or significance of information.	A couple spelling mistakes are present in the presentation. Presentation is a bit boring or has too many focuses.	Coordination and team work is not clearly demonstrated.	Answers are unclear or confused. Unable to answer any question not

			No particular insights into issues. A mere assemblage of facts. Evidence on a lack of understanding of the information or issue.			directly from the presentation.
0	Complete disorder. Random assortment of facts.	Basic knowledge of the topic with some errors. Explanations consistently vague and inaccurate or facts just stated.	No analysis is exhibited.	Content is not transmitted by the slides.	Presentation is essentially independent between different group members.	Unable to answer any questions.
