Presentation Guidelines for the Group Project

1. Formal dressing is not necessary for the presentation; at least you will not be assessed on that.
2. The audience of your presentation is **everyone** in attendance. You are not merely giving a presentation to the course teachers, but your classmates as well. Take this into account when preparing your presentation. Namely, you **should not assume a great deal of prior knowledge** about your topic and/or scientific or mathematical technical requirements.
3. We do not object to your using note cards or using your smart phones as note cards during your presentation. However, it may not be an effective way to communicate with your audiences if you keep looking at the notes.
4. The total presentation time for each group will be 12 minutes, followed by an extra 3-minute Q&A session. In view of the tight time constraint, your presentation may be cut off if it exceeds 12 minutes.
5. Do **not arrive late** to your tutorial on the day of your presentation. If you arrive late, you will be **penalized 5 marks** out of 15.
6. We would like to hear each of you speak during the presentation, so please share the presentation equally among yourselves.
7. We would like to hear YOUR presentation rather than a presentation from Youtube or any videos. If showing us videos really helps the presentation, please confine them to no more than one minute.
8. Please upload your presentation file (in one of the following formats: ppt, pptx or pdf) through Moodle before 1st November, 2026 at 16:55 (this deadline is strict in order to be fair to all

groups). If you fail to upload the file by the aforementioned time, **5 marks plus 0.5 per additional day** that you are late (up to the date of your presentation) will be deducted from the presentation. For example, if you are one week late, then you will receive an 8.5 mark penalty (5 marks for being late and 3.5 marks for an additional 7 days; if the due date is on a Monday and you turn it in before Tuesday (i.e., too late in the day on Monday), the penalty will be 5 marks, and if you turn it in on Tuesday, then the penalty will be 5.5 marks.

9. Your presentation will be assessed on its content and its fluency/clarity/coherence. You can find a detailed marking descriptor for the presentation in Moodle.
